

600360 – A200 Tandem Bar Assembly

The 600359 –D-Style Pivot Plate mounts directly to the Tandem bar and can hold the CDK12.5 and CDK14 or any telescope using the Losmandy D-Style dovetail mounting bar. The 600359 has both altitude and azimuth adjustment screws which allows you to align the scope to the same position as the main telescope.

600358 - Planewave Fixed Dovetail Plate allows you to mount the existing dovetail clamp (200919), which come standard with the A200 mount, onto the tandem bar

600357 - D-Style Fixed Dovetail Plate mounts directly to the tandem bar and allows you to attach any telescope with a Losmandy D- style dovetail mounting bar.
